### **UPGRADED NIVEUS MEDIA SERVERS DELIVER AUDIOPHILE QUALITY SOUND**

**With Intel processing, Pro Audio and advanced functionality, Niveus' 2008 product offers the highest fidelity entertainment experience.**

**Long Beach, CA – EHX Fall 2007 – November 6-9<sup>th</sup>** – Niveus Media, the leader in high-end digital entertainment solutions for the connected home, introduces the 2008 line of Media Server products. Now boasting Pro Audio and powerful Intel processing, Niveus has optimized their Media Servers to provide pristine audio and video performance for superior home theater production and remarkable whole-home entertainment.

As part of the 2008 focus to develop the most refined devices for exceptional digital entertainment throughout the home, Niveus has beefed up their entire Media Server offering including the passively cooled Summit Series Rainier and Denali Editions and the Pro Series n4, n7, and n9 Editions. Advancements to all servers include new Seagate<sup>®</sup> DB35 Series<sup>™</sup> hard drives for video streaming performance, acoustics & reliability and Nvidia's GeForce Series 8 graphics featuring PureVideo<sup>™</sup> HD technology for high quality video scaling up to and beyond 1080p.

One of the most distinguished upgrades sure to resonate loudly in the audiophile market is the addition of a "Pro Audio" chipset in the Pro Series n7 & n9 and the Summit Series Denali Edition and Denali Limited Edition. The dedicated sound card provides the cleanest and highest resolution audio from all channels (up to 7.1), and features digital-to-analog converters from Burr-Brown, chosen in top professional or consumer audio equipments around the world.

Niveus' Pro Audio features an impressive signal-to-noise ratio (SNR) of 118 db for both audio in and out and is able to deliver 118 db quality audio for 7.1 channel sound. Incorporating multiple technologies from Dolby and DTS (Dolby Digital Live, Dolby Virtual Speaker, Dolby Pro Logic<sup>®</sup> IIx, DTS Interactive, and more!), Niveus' Media Servers deliver outstanding, unmatched audio reproduction.

As part of their testament to providing rich audio and video production with powerful processing, the rack mountable Pro Series Media Servers, including the n7, n9, and the new n4, have all been upgraded to feature the Intel® Core™ 2 Quad processor, which provides four independent cores with dedicated threads, to efficiently off-load tasks and more readily serve up media including HD video to multiple rooms of the home.

All Niveus Media's Windows Vista Ultimate-based Media Servers are capable of storing, managing, and playing TV, music, movies, and photos while offering the highest level of Media Center performance. Niveus' 2008 line of product is available now.
